PRIYA SHARMA
Senior Full-Stack Cloud Architect
Email: priya.sharma@techsphere.io
Phone: +1 (415) 890-2341
Location: Seattle, WA
LinkedIn: linkedin.com/in/priyasharma-cloud
GitHub: github.com/priyasharma-dev

PROFESSIONAL SUMMARY
Senior Cloud Architect and Full-Stack Engineer with over 9 years of experience designing resilient distributed systems, ever

TECHNICAL SKILLS
- Programming Languages: Python, TypeScript, JavaScript, Go, SQL, Bash
- Frameworks & Libraries: FastAPI, React, Next.js, Node.js, Express, PyTorch, Tailwind CSS
- Cloud & DevOps: AWS (EKS, Lambda, S3, RDS, CloudFront), Docker, Kubernetes, Terraform, GitHub Actions
- Databases: MongoDB, PostgreSQL, Redis, Elasticsearch
- AI & LLM Systems: Groq API, LangChain, Hugging Face, Retrieval-Augmented Generation (RAG), Vector Embeddings
- System Design: RESTful APIs, GraphQL, Microservices, Event Sourcing, Distributed Caching

WORK EXPERIENCE

Lead Cloud Solutions Architect | TechSphere Solutions, Seattle, WA
January 2021 · Present
- Designed and delivered enterprise-scale document ingestion platform processing 450,000+ unstructured documents daily
- Spearheaded integration of high-speed Groq LLM inference pipelines, reducing end-to-end semantic classification latency
- Mentored a distributed team of 14 senior engineers across frontend, backend, and platform reliability disciplines.
- Transitioned on-premise infrastructure to AWS Kubernetes clusters, saving $320,000 annually in compute overhead.

Senior Full-Stack Engineer | Apex Data Systems, San Francisco, CA
June 2017 · December 2020
- Built responsive analytical dashboards using React, Vite, and Tailwind CSS serving 120,000+ daily active enterprise users
- Developed asynchronous backend services using FastAPI and PyMongo, achieving sub-40ms P99 response times.
- Implemented robust centralized authentication, role-based access control (RBAC), and automated audit logs.

Software Engineer | NexaCorp Technologies, Austin, TX
August 2015 · May 2017
- Developed RESTful API microservices with Python and PostgreSQL.
- Authored automated unit and integration test suites achieving 94% test coverage across core payment workflows.

EDUCATION
Master of Science in Computer Science
University of Washington, Seattle, WA (2013 · 2015)

Bachelor of Technology in Information Technology
National Institute of Technology, Trichy (2009 · 2013)

KEY PROJECTS
1. Enterprise Document Brain: High-throughput document intelligence service utilizing FastAPI, MongoDB, PyMuPDF, and G
2. FastVector Cache: Distributed low-latency embedding cache built on Go and Redis for semantic document deduplication.
3. KubeAutoScaler: Open-source Kubernetes operator automatically resizing cluster workloads based on queue depth metri

CERTIFICATIONS
- AWS Certified Solutions Architect · Professional (SAP-C02)
- Certified Kubernetes Administrator (CKA)

- MongoDB Certified Developer Associate
